

Arkadii Shvartcman

FRONTEND DEVELOPER

(middle+/senior)

About me

I am a software engineer specializing in the field of React/Typescript/Next.js/FE-AQA/Videoplayers, with a product vision I have worked in completely different areas (mainly B2B), understanding and interested in business priorities and user experience, and attentive to documentation for integrations, testing, onboarding (and new employees to the project and users to the product) and deployment, reverse studying Jira, git and other sources of project history to understand the intricacies and processes, not afraid to take responsibility for areas unknown to me and to integrate into them.

I have experience in project support and migration, formation of jira-flow/jira-automation-flow teams, scrum, git flow, release and engineering culture

2021-2022

VK | Moscow, Russia | full-time remote

Frontend Developer

VK is a technology company. It started as an e-mail service and went on to become a major corporate figure in the Russian-speaking segment of the Internet. VK operates an e-mail service, Internet portal Mail.ru, and social networking services VK, Odnoklassniki and MoiMir. Additionally, VK manages various e-commerce, transport, and communication platforms. It also offers business-oriented products, including a corporate email and communication system. VK's sites reached approximately 86% of Russian Internet users every month and the company was in the top 5 of the largest Internet companies.

Project: [VK teams](#)

- styles and scripts optimisation (+100%)
- autotests integrations (**playwright, jest, enzyme, GitLab CI/CD pipelines**)
- provide technical interviews and documentation
- migration legacy stack to **React + typescript**
